

Cornerstone – Credly Integration

Enable CSOD completed courses, certifications and other learning objects to automatically send an API call to issue a verified digital credential directly to the learner.

- Automate the issue of verified skills-based credentials for your internal Academy or other recognition-worthy programs to better identify, motivate, retain and engage your workforce.
- Reinforce your culture of learning and skills improvement with portable, verified skills credentials that empower your employees.
- Recognize authorized partners and those certified on your product with verified credentials issued to external parties.

Prerequisites

- Cornerstone Learning
- The Credly by Pearson/CSOD integration requires the purchase of an annual subscription of badges (or earners for unlimited issuing) and the acceptance of Credly by Pearson's [Terms of Service](#)

Setup Instructions

1. Contact your Cornerstone Account Manager to purchase this integration. The account manager will put in a request to install the integration in your Cornerstone Portal.
2. Once the integration has been installed in your Cornerstone portal, log into your Cornerstone Portal, navigate to the Edge Integration Center (Admin>Tools>Edge>Integrations) and search for Credly. Click on the tile
3. Copy the Client ID, Client Secret, and Base URL and provide it to your Credly Customer Support Manager (CSM)
4. Click the 'Back' button. To launch the Credly application, click the slider to the right to enable the integration.
